Take care of yourself

Valerie studies at a big university. At the same time, she maintains a full-time job so that she can pay for her tuition and her living expenses. So, Valerie spends most of the day at the office, then goes to class three days a week. She also stays up late at night to study for her classes.

Valerie does not do any physical exercise. Between work and university, she is so busy that she thinks she does not have time for any physical activity.

Sadly, she rarely eats home-made meals. She usually just grabs a bag of chips or a

hamburger as she leaves her office to take the bus to university. Since she is convinced that she does not have time to make a healthy dinner when she gets home, she eats lots of pizzas that she orders over the phone.

After dinner, she starts studying and preparing her assignments. Valerie does not sleep very much because of it. She feels grumpy when she wakes up early in the morning, and she is irritable at work. After her long day, she feels tired in class, and it is hard for her to concentrate.

- Now add formatting so that the web page actually appears in the above format.
