## Creating a web page (unzip the file Images.zip to get the required images for this assignment)

- Open Notepad or any other text editor.
- Save this file as **index.htm** in your work folder. It should have 3 links and should appear as follows:

- If you click on the online shopping link, it should take you to the following web page:

Shop online! You can find your shopping links to the left. Click on the logos..

To move to home page, Click here

- Each of the logos on the left should take you to the corresponding web site.
- If you click on the movies link on **index.htm**, it should take you to the following web page:

Watch your favorite movies! Find links to the left of the page.

To move to home page, Click here

- Add links to the logos so that you can navigate to the respective sites.

- If you click on the link for booking tickets on **index.htm**, it should take you to the following web page:

- Again, add links to the logos on the left so that you can navigate to the respective sites.
- Note that on each of the above pages, you should have the option of navigating back to the home page.
